### Description

In 1954, human remains representing, at minimum, one individual were removed from site 23PL1, commonly referred to as the Renner Site, in Platte County, MO. These human remains (catalogue number: I.1995.268 (part of 2000.7)) were excavated with the private landowner's permission during an archeological project conducted jointly by the Kansas City Museum, the University of Missouri, and the Kansas City Archaeological Society. The human

remains – skull fragments – belong to a subadult of unknown sex. No associated funerary objects are present.

### **Cultural affiliation**

The human remains and associated funerary objects in this notice are connected to one or more identifiable earlier groups, tribes, peoples, or cultures. There is a relationship of shared group identity between the identifiable earlier groups, tribes, peoples, or cultures and one or more Indian Tribes or Native Hawaiian organizations. The following types of information were used to reasonably trace the relationship: geographical, historical, and expert opinion.

### **Determination**

Pursuant to NAGPRA and its implementing regulations, and after consultation with the appropriate Indian Tribes and Native Hawaiian organizations, the Kansas City Museum has determined that:

- The human remains described in this notice represent the physical remains of at least one individual of Native American ancestry.
- There is a relationship of shared group identity that can be reasonably traced between the human remains described in this notice and the Pawnee Nation of Oklahoma.

Repatriation of the human remains in this notice to a requestor may occur on or after [INSERT DATE 30 DAYS AFTER DATE OF PUBLICATION IN THE **FEDERAL REGISTER**]. If competing requests for repatriation are received, the Kansas City Museum must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of
